### National Park Service Gears Up for Centennial Challenge Projects

Catoctin Mountain Park will benefit from among the national proposals National Park Service Director Mary Bomar and Secretary of the Interior Dirk Kempthorne announced at a press conference in Yosemite National Park today to celebrate the 91<sup>st</sup> anniversary of the NPS.

“The National Park Service has, after a rigorous review, certified proposals as eligible for centennial challenge matching funds,” Bomar said. “And they are ready to go in Fiscal Year 2008 which begins Oct. 1.”

Among the \$370 million of proposals eligible for centennial challenge matching funds are several cross-cutting projects that affect multiple parks, including a national incentive to boost the Junior Ranger program and to increase the research in the “All Taxa” inventories, an ecosystem-wide look at species existence.

Director Bomar said, “The centennial challenge is a critical element in the National Park Centennial Initiative put forward by President Bush and unveiled by Secretary Kempthorne one year ago. The full centennial initiative is a potential \$3 billion investment in our national parks, two thirds of it a public-private partnership of matching money.”

The President’s fiscal year 2008 budget called for an additional \$100 million a year for 10 years to be dedicated to bolster basic park operations, Bomar said. Congress has included the first \$100 million for operations in the fiscal year 2008 budget that awaits final passage.

“The second part of the initiative is the centennial challenge – a funding mechanism to match up to \$100 million a year over 10 years of public money with \$100 million a year for 10 years in private donations,” Bomar said. “Congress has yet to finish legislation necessary to create the public-private centennial challenge.”

Financial commitments to the first round of proposals exceeded the President’s challenge. “We have about \$370 million in proposals with, not \$100 million in private commitments, but \$216 million committed from park visitors, friends groups and other partners,” Bomar said.

“I’ve testified before Senate and House subcommittees and judging by the warm reception we received, I believe Congress will include centennial challenge money in our next budget,” Bomar said. “We look forward to working with members from both sides of the aisle to provide the key to the centennial challenge. When that happens we can make decisions on which of these wonderful proposals to begin in the fall.”

Locally, Superintendent Mel Poole said, “I have the full commitment of the Director and our partners to work toward the goals of the centennial – stewardship, environmental leadership, recreational experience, education, and professional excellence. We have a great opportunity to reach toward these matching funds for Maryland and Frederick Counties in 2009.”

“Our park has a centennial vision and a strategy to implement that vision,” said Superintendent Poole. “Catoclin has been a place for renewal since its inception. Beginning as an opportunity to transform land use during the depression to a woodland refuge for today’s visitors, Catoclin will continue to provide opportunities for recreation, family fun, connecting children to the environment and preservation of our natural and cultural resources. Sleeping under the stars, staying overnight in an historic cabin, hiking trails, fly-fishing, and wildlife watching, are all opportunities for our visitors to connect to our environment and Catoclin Mountain Park.”

The list of proposals for 2008 – at 116 parks in 40 states and the District of Columbia – touches parks nationwide with a centennial effort to inventory every living thing in the national park system. The all taxa biodiversity inventory will focus on a bio-blitz at Catoclin Mountain Park to help further establish a baseline inventory for the park.

To be certified, proposals had to address at least one of the five over-arching centennial goals. They also had to be imaginative and innovative, addressed critical Service needs, had a philanthropic partner, required little or no additional recurring operating funds to be sustainable, improved the efficiency of park management, operations and employees and produced measurable results

Other certified eligible proposals:

- Lewis and Clark National Historical Park adopting the Class of 2016 with the goal of turning students to stewards.
- Additional student education through Acadia National Park’s “No Child Left Inside” project.
- Strengthening efforts to save Kemp’s Ridley sea turtles – the world’s most endangered sea turtle – with citizens assisting park rangers to observe and relocate nests on Padre Island National Seashore, the turtle’s most important U.S. nesting habitat.
- Restoration of more than 50 miles of important foot trails in Yosemite National Park.
- Climate change research of glaciers at Mount Rainier National Park and
- Utilizing scientists and volunteers to study life along the Appalachian Trail seeing national parks as an environmental barometer.

“There is a huge wave of excitement among National Park Service professionals and our partners,” Bomar said. “We will create park-based centers for Junior Rangers, implement cutting-edge energy projects like fuel cells and geothermal and build multimedia wayside exhibits that “talk” to visitors. This is a victory for national parks and over 270 million park visitors we see each year.”

“Last week, I sent an email to the men and women of the National Park Service to inform them of our announcement. One of the replies I received says it best: “This is thrilling! A win/win opportunity like we’ve never seen before. Thanks for the energy and vision for the NPS.”

“That thanks is for the many who worked to transform vision into action: Secretary Kempthorne and our friends in Congress, from both sides of the aisle who introduced legislation to support the Centennial. But most of all, our thanks go to park superintendents, friends groups, partners and an army of supporters.”
